Success Stories

Harlington Village Pre School

About

Harlington Village Pre-school is based in Bedfordshire, England and offers excellent care and education for children aged 2 to 9 years.

Their team of highly qualified practitioners provide a warm, welcoming, and friendly environment where children can play, learn and develop to their full potential.

They provide the first stepping stone on a child's educational journey, building a good foundation for future learning and ensuring children have the confidence to succeed.

The Challenge

The teachers at Harlington Village Pre School are aware of how new technologies are changing education. The way of teaching and the dynamics in the classroom must be adapted to the opportunities of the digital age and in order to offer the highest educational standards to their students they needed to replace their current whiteboards with a modern piece of technology.

The school was looking for a digital tool with which pupils could interact, and which would also allow them to share educational materials in a digital format, such as Google Classroom, to work on the different aspects included in the national educational programmes.

The Solution

All staff endeavour to take a child on a learning adventure that excites and provokes curiosity. Their aim is for all children to leave the school setting confident, happy and as creative learners.

In its efforts to offer the best teaching to their students, Harlington Village Pre-school is investing in its facilities and equipment.

After removing the old display board and securing the brackets in position, the Vestel 65" Non-Interactive 4K professional display was put in place by the TG Systems Field Support team.

The Results

The Vestel 65" Non-Interactive 4K professional display has found a natural home in the classroom. Designed with the education market in mind it is going to revolutionise the way the teachers of the Pre-school teach forever.

It supports teaching and helps increase student engagement, encourages active learning in students of all ages, levels, abilities and disabilities. It awakens their curiosity and motivates them to learn and it will allow them to continue to be nurtured, inspire and flourish.

Harlington Village Pre School

"We were so impressed with the professionalism of TG Systems UK who navigated us through this new purchase to revolutionize the technology in our classroom. The installation was quick, efficient and very neat, they even removed the old display board for us!

The children are delighted with the ability to independently access educational games and the screen is in regular use. We are also using it to enhance our learning about our topics by watching video clips, PowerPoint presentations and to view photos that the children have taken in and around the learning environment. We couldn't be happier, Thank you!"
