

## TG Systems UK

## Boundless Learning Case study

### Background

Boundless Learning are an educational organisation focused on partnering with educators to provide and support online teaching. Their office is located inside St Martin's Court, situated next to St Paul's underground station. We were approached with installing IT equipment for their new office space from one of our long-term clients.

### The Challenge

The TG team were tasked with installing 173 monitors, 173 mouse and keyboard, and 70 docks.

### The Results

TG successfully carried out the installation within a 3 day period, having had a delay in delivery. We are pleased with what we have achieved as the office is now ready to be used.
