

TG Systems Uk

Purwell School

Case Study

Challenge:

Purwell School required a complete interactive display upgrade across their learning spaces. The brief included installing an interactive touchscreen in every classroom, alongside a large 85" display in the main hall to support assemblies, presentations, and whole-school activities.

Solution:

TG Systems supplied and installed interactive touchscreens throughout the school, creating consistent, engaging digital learning environments in every classroom. The addition of the 85" hall display provides a powerful focal point for assemblies and shared events. The result is a future-ready setup that enhances collaboration, supports dynamic teaching methods, and delivers clear, impactful communication across the entire school.
